See explanation. The basic principle of NMR is to apply an external magnetic field called  $B_0$  and measure the frequency at which the nucleus achieves resonance. Electrons orbiting around the nucleus generate a small magnetic field that opposes  $B_0$ . In this case we say that electrons are shielding the nucleus from  $B_0$ . Shielding: The higher the electron density around the nucleus, the higher ...

The second row contains 'organic compounds', of which millions are known, so there is frequently a bias in teaching chemistry to focus on the "octet rule". In fact, there is a duet rule to be considered for hydrogen, helium (and lithium which dimerizes in the gas phase), and the 'rule of 18' for transition metals.

This is the thirteenth installment of the Organic 101 series that explores different aspects of the USDA organic regulations. The use of genetic engineering, or genetically modified organisms (GMOs), is prohibited in organic products. This means an organic farmer can't plant GMO seeds, an organic cow can't eat GMO alfalfa or corn, and an organic soup producer can't use any GMO ingredients.

You see, there is nothing remotely "smart" about Smart Balance unless of course, you happen to be a shareholder of the company. In that case, you would be very happy with the cheap, rancid, genetically modified vegetable oils used to manufacture substitutes for butter resulting in a very low cost of production and handsome profit margins.. Don't think for one moment that Smart Balance ...
