Milling machine arbors are made in various lengths and in standard diameters of 7/8, 1, 1 1/4, and 1 1/2 inch. The shank is made to fit the taper hole in the spindle while the other end is threaded. NOTE: The threaded end may have left or right-handed threads. The milling machine spindle may be self-holding or self-releasing.

[milling machine | Gumtree Australia Free Local Classifieds](#)

Usually a rookie will ask this question. Here is a number breakdown. For manual Bridgeport and lathe, maximum accuracy you can reach is about 0.0005 inches. I don't think you can make parts with 2 tenth tolerance on a 50 year old Bridgeport. So you only need scale accuracy to match 5 tenths or a little above

This question would be best answered by some of the Bridgeport old-timers. In some of my searches I discover new(old) attachments for bridgeport/type machines. When you look on ebay you see the standard Bridgeport type heads Right angle and Quillmaster. The Volstro type accessories-angle head/rotary head/slotting head.

[Wells Index Vertical and Horizontal Milling Machine ...](#)

Machines such as the Bridgeport Boss, V2XT and DX32 series and others like Sharnoa, Wells Index, Shizouka, YCI YCM-40 and others are made for CNC knee mills and can often be had for less than the cost of a good manual knee mill. The advantage of a manual to CNC conversion is in retaining the manual control of the machine tool. Axis Motor mounts
