The Cat two-piece piston design combines the service, secondary, parking brake, and retarding functions in the same system. The primary piston hydraulically actuates both service and retarding functions. The secondary piston is spring-applied and held in the disengaged position by hydraulic pressure. If hydraulic system pressure drops below

The entire 7.4 efi and b3 drive cost me 3500. I dropped another couple thou on parts and a service on the drive. It had only a few hundred hours on it and when I pulled the heads off the cylinders are like new still. I'm just sayin that even a good used engine needs a thorough going over to include all new gaskets and seals.
