[Chapter 18 Section 4 Guided](#)

A robot is a machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed on the lines of human form, but most robots are machines designed to perform a task with no regard to their aesthetics.

Lateral violence is a multilayered, complex problem and because of this our strategies also need to be pitched at different levels. In Chapter 3 I have looked at the big picture, with the human rights framework as our overarching response to lateral violence. In this Chapter I will be taking our strategies to an even more practical level, looking at how we can create environments of cultural ...
