Inkscape may have a font substitution problem depending on what the PDF uses and your system. Gimp will rasterize text, so you would need to open the page at a high dpi for text to appear smooth. I would say at least the resolution you intend to print at. But Inkscape would be a better choice. ¶ Scott McClenning Feb 10 '15 at 3:21

Open PDF in GIMP (free photo editor) as an image. Only open those pages that need redaction. When you open it as an image, it essentially flattens the pdf so you're no longer able to highlight and copy text. Use tools in GIMP to black out text. Then, file -> print. On the print screen, choose "Print Preview".

Undoubtedly, people use a variety of programs to draw diagrams for physics, but I am not familiar with many of them. I usually hand-draw things in GIMP which is powerful in some regards, but it is time consuming to do things like draw circles or arrows because I make them from more primitive tools. It is also difficult to be precise.
