Solvate and Hydrate Isomerism: A special Type of Ionization Isomers. A very similar type of isomerism results from replacement of a coordinated group by a solvent molecule (Solvate Isomerism), which in the case of water is called Hydrate Isomerism. The best known example of this occurs for chromium chloride ($\text{CrCl}_3 \cdot 6\text{H}_2\text{O}$) which may contain 4, 5, or 6 coordinated water molecules ...

Kellyn Rein, in Strategic Intelligence Management, 2013. Conclusions. Intelligence gathering is an essential task for a nation to preserve life and property. However, because of the variety of players, the volume of information flowing in, and the diversity of sources and formats including various human languages, it is a monumental task to try to fuse details into a larger picture.
