Few principles in the management of change are as well documented or understood as the idea that involvement breeds commitment, yet organizations continue to ignore this principle. In the U.S., where individualism reigns supreme, managers who do not involve their workers in decisions that affect them run the risk of stalled change efforts.

Computer-aided design (CAD) is the use of computers (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files for print ...
